

Nursing mini-hospital

This facility prides itself with emergency, isolation, and pediatrics rooms, an orthopedic ward, operating and recovery rooms as well as a delivery room and a nursery.

Anatomy and Physiology Lab

This lab helps students to learn human physiology and anatomy. Equipped with models of the human body, the lab is designed to serve the needs of nursing students and other health-related subjects.

Chemistry Lab

With complete apparatus and equipment, the lab gives students an opportunity to learn and master the basic chemistry lab techniques for carrying out experiments.

Nursing Skills Labs 1&2

The labs provide an environment students to practice and demonstrate nursing skills. Mannequins, models, and other equipment provide a non-threatening, hands-on learning environment for skill acquisition.

Vision, Mission, and Values

We envision ourselves as an accredited institution providing nursing education and commit ourselves to provide quality nursing education with Filipino and Dominican Orientation, within the context of human development and quality of life. We uphold the following core values: Discipline, Excellence, Innovation, and Leadership.

Academic Program

SN

SCHOOL OF NURSING

BS Nursing

The Bachelor of Science in Nursing course is a four-year formal educational program consisting of subjects in General Education and Professional Nursing. The program is designed to prepare you to become a professional nurse who would:

- Practice Professional Nursing to individuals, families, and groups of any socio-demographic origin, in any setting – institutional or community, of any phase of the health-illness continuum, in the areas of disease prevention, health promotion, restoration and maintenance, and even during the time of death;
- Conduct research and apply research findings to improve the theoretical base of the profession, as well as nursing practice. Use critical thinking process in decision-making in rendering care;

- Provide community services to meet health care needs of specific clients and utilize government and non-government agencies and resources; and recognize the value of pursuing development programs, even after graduation for personal and professional enhancement.

You will be trained at well-equipped laboratories which feature cutting-edge equipment, including simulated nursing labs, a mini-hospital complete with emergency, isolation, and pediatrics rooms, an orthopedic ward, operating and recovery rooms as well as a delivery room and a nursery. You will be prepared for nursing careers in all health-care settings as practitioners, educators, and managers. As a Letranite Nursing major, you will benefit from a comprehensive curriculum and extensive training given by nursing instructors, most of whom carry Masters in Nursing degrees.
