Foreword

This volume of SUBIR 4 presents a collection of data analyses conducted by various departments within Colegio de San Juan de Letran Calamba. These studies delve into crucial aspects of institutional life, ranging from student performance and academic outcomes to administrative process and employee well-being. From analyzing college continuation rates of senior high school graduates to evaluating the effectiveness of the on-the-job training program for BS Psychology students, these studies provide valuable data-driven insights. Furthermore, the journal examines the effectiveness of various programs and initiatives, including the Grade 12 Work Immersion program, the "PAGHAYO" retreat for students, and the "GINHAWA" retreat for personnel. By analyzing student feedback and program outcomes, these studies identify areas of strength and weakness, informing future program improvements and enhancements. Ultimately, this volume of "SUBIR" is a valuable resource for faculty, staff, and administrators seeking to enhance teaching and learning, optimize resources, and improve the overall quality of education at Colegio de San Juan de Letran Calamba. These studies demonstrate Colegio's commitment to continuous improvement and dedication to evidence-based decision-making. We encourage readers to explore these insightful analyses and utilize the findings to inform their own work and contribute to the institution's continuous improvement
