# Foreword

*This volume of SUBIR 5 presents a valuable collection of data analyses undertaken by various departments within the institution. These studies delve into a diverse range of topics, from the psychological factors influencing internship placements to the effectiveness of library orientations and the performance of nursing graduates. The research conducted by our administrators, faculty, and staff, plays a crucial role in shaping the future of our institution. The articles within this journal demonstrate the power of data-driven insights to inform and improve various aspects of academic and institutional life. By analyzing trends, identifying areas of strength and weakness, and uncovering hidden patterns, these studies provide a solid foundation for evidence-based decision-making and continuous improvement. "SUBIR" serves as a valuable resource for administrators, faculty, and staff, seeking to enhance teaching and learning, optimize resource allocation, and, ultimately, improve the overall quality of Letran Calamba's education and services. We encourage readers to explore these insightful analyses and utilize the findings to inform their own work and contribute to the ongoing development of our institution.*
